

Water Line Maintenance Work & Temporary Trail Closure

Project Delayed. Please check back here for project updates.

Centennial Water & Sanitation District is currently working with a contractor, C and L Water Solutions, on water line maintenance work in the open space area north of Highlands Ranch Parkway, west of Venneford Ranch Road and south of Glenwood Lane. The work will require one excavation site west of the concrete trail that runs north/south. Due to the excavation site, as well as equipment coming in and out of the job site, the trail access north of Highlands Ranch Parkway will be closed during this project. Please see the map below.

The work will begin Monday, February 26 and should be completed the week of March 18, weather permitting.
